

International Journal of Machine Learning and Computing

CONTENTS

Volume 5, Number 3, June 2015

• Data Mining and Machine Learning

Unsupervised Cross-Language Classification with Stratified Sampling-Based Cluster Ensemble.....165
Wenli Gui, Liping Jing, Liu Yang, and Jian Yu

TR-LDA: A Cascaded Key-Bigram Extractor for Microblog Summarization.....172
Yufang Wu, Heng Zhang, Bo Xu, Hongwei Hao, and Chenglin Liu

A Hybrid Artificial Bee Colony with Differential Evolution.....179
Chukiat Worasucheep

Pruning Classification Rules with Instance Reduction Methods.....187
Osama M. Othman and Christopher H. Bryant

Short-Term Mortality Prediction for Elderly Patients Using Medicare Claims Data.....192
Maggie Makar, Marzyeh Ghassemi, David M. Cutler, and Ziad Obermeyer

• Computer Vision and Image Processing

Mutiscale Texture Segmentation Using Contextual Hidden Markov Tree Models.....198
Din-Chang Tseng and Ruei-Lung Chen

A 3-DVideo Watermark Embedding Technology in DCT-CS Domain.....206
Longfei Cai, Huimin Zhao, Jun Cai, and Li Zhu

Pedestrian Density Estimation by a Weighted Bag of Visual Words Model.....214
Shilin Zhang and Xunyuan Zhang

Roundness Measurement in Spring Clamps Based on a Novel Particle Swarm Optimization.....219
Xia Zhu and Renwen Chen

An Automated Tool for Non-contact, Real Time Early Detection of Diabetes by Computer Vision.....225
Jamal Firmat Banzì and Zhaojun Xue

• Distributed Computing and Robotics

Protecting Cloud Data Using the Decentralized Information Flow Control with Authorization Condition.....230
Ye Jianwei, Xu Jie, Jiao Xulu, and Xu Zhikai

Enhancing Case-Based Retrieval Engine with Case Retrieval Nets for Humanoid Robot Motion Controller
.....235
Meteb M. Altaf, Bassant M. El Bagoury, Fahad Alraddady, and Said Ghoniemy

Evidence Theory in Incomplete Information Tables.....242
Yu-Ru Syau and En-Bing Lin

• **Information Management and Modeling**

Inferring Markov Chain for Modeling Order Book Dynamics in High Frequency Environment.....247

Yuan Lung Chang

Assessing the Relationship between Economic Factors and Adverse Events in an Active War Theater Using Fuzzy Inference System Approach.....252

Erman Cakit and Waldemar Karwowski
